# Wavescan 2.4R33783 Release Notes

## System Requirements

- **Supported operating systems**: Windows® 7, Windows® 10 (32-bit and 64-bit editions)
- **Recommended network**: Built-in wired or wireless network adapter. USB-to-network adapter also acceptable. Wireless network adapter, driver, and operating system should support IBSS (ad hoc) connection types.
- **Minimum resolution**: 1280 × 768 pixels

## New Features and Improvements

- Eddyfi support resources and branding
- New tutorial videos
- Option to not install Mk III shortcut at install

## Modifications to Existing Features

- Improved Wavescan user guide

## Dropped Features

- Removed road crossing feature from multi-location report
- Removed pipe diameters greater than 1.850 m (73 in) from database

## Resolved Issues

- Removed references to stock data when opening TT2 files
